Module 7: Introduction

Overview

In this module, we will be conducting peer review of reports. You will use the skills in reading papers you have gained in earlier modules to read papers from your classmates and we will guide you on how to offer constructive criticism. You will also be preparing your code for others to read it by adding descriptive comments.

Learning Objectives

By the end of this module, you'll be able to:

7.1 Biology/Stats (3 hours)

1. Constructively review technical papers

7.2 Coding (30 min)

1. Prepare code and results in order to maximize utility to scientific community

7.3 Research/Professional development (30 min)

1. Propose relevant follow-up questions for future research
